

MORGAN FETTER

Senior Program Manager | AI-Augmented Operations | Contact Center Transformation
719-235-6249 | morganfetter@gmail.com | [linkedin.com/in/morganfetter](https://www.linkedin.com/in/morganfetter) | Remote-First | Denver / Colorado Springs

PROFESSIONAL PROFILE

Operations and program management leader with 20+ years of contact center experience and a proven track record of deploying AI-augmented solutions that generate measurable business outcomes. Most recently deployed and manages Raya, a nationally scaled agentic voice AI operating across the US and Puerto Rico in English and Spanish, delivering \$624K in annual labor savings, 25% call deflection, and an 83% reduction in average handle time while maintaining a 4.4 nationwide Google rating. Skilled at identifying high-cost operational problems and engineering intelligent, scalable solutions across people, process, and technology.

CORE COMPETENCIES

☐ Agentic AI Deployment & Mgmt	☐ Program & Project Management	☐ Contact Center Operations	☐ Process Design & Optimization
☐ Prompt Engineering (LLM Ops)	☐ Cross-Functional Stakeholder Mgmt	☐ Workforce & Vendor Management	☐ Cost Reduction & ROI Analysis
☐ ElevenLabs & Langfuse	☐ Salesforce & Avaya	☐ Knowledge Base Architecture	☐ Department Start-Up & Scaling

PROFESSIONAL EXPERIENCE

Freedom Forever

National home services and residential construction company operating across 25+ states.

Senior Manager, Customer Support

Sept 2025 – Present Remote

- Inherited a customer support department at 15% service level and drove it to 78% within 3 months — while absorbing a 25% FTE reduction — through queue redesign, cross-functional agent training, and a coaching-forward leadership model that prioritized weekly development sessions over on-phone metrics.
- Eliminated siloed specialty teams, including a dedicated cancellation queue, and retrained all agents to handle cross-functional actions, enabling one-call resolution and reducing internal transfers across the board.
- Reduced voluntary attrition from 15% to 5% by building a culture centered on off-phone coaching, individual leader accountability, and a no-surprises approach to team communication that preserved trust at every level.
- Improved team absenteeism from 20% to 5% by replacing rigid blanket policies with forecast-driven time-off management and coaching supervisors to treat attendance as a shared ownership metric.
- Continuing expansion of Raya into outbound correspondence and omnichannel capabilities including chat and email; actively leading vendor evaluation for chat AI integration.
- Drive cross-functional alignment between support, operations, and technology teams to ensure AI agent performance meets evolving business and regulatory requirements.

Program Manager

July 2022 – Sept 2025 Remote

Promoted to Senior Manager after deploying Raya, an agentic AI voice assistant that became the company's flagship automation initiative.

- Deployed and engineered Raya, a bilingual (English/Spanish) agentic voice AI serving inbound customer support across the US and Puerto Rico, resulting in 25% call deflection and \$624K in annual labor savings equivalent to 8 FTEs.
- Reduced average handle time from 12 minutes to 2 minutes per interaction by enabling AI-driven real-time access to permitting data, construction timelines, and application status, eliminating manual research time per call.
- Maintained 4.4 nationwide Google review rating throughout AI transition; oversaw BBB complaint resolution program contributing to a grade improvement from F to C+.
- Served as sole deployment specialist for a company-wide telephony migration from RingCentral to Dialpad across 1,000+ users, managing vendor coordination, user onboarding, and go-live execution end to end.
- Managed Raya's full prompt engineering lifecycle through ElevenLabs and Langfuse, including knowledge base architecture, conversation flow design, and continuous performance tuning.
- Developed and maintained SOPs, program governance frameworks, and cross-departmental workflows in alignment with organizational strategic goals.
- Served as subject matter expert on AI tools, platforms, and organizational systems, advising leadership on automation opportunities and process gaps.

Manager, Inside Sales & Customer Support *Tesla, Inc.* | *May 2018 – May 2020 Las Vegas, NV*
Led inside sales and customer support operations for Tesla Energy and vehicle product lines, managing a team of 8 direct and 150 indirect reports.

- Drove customer support service level from 35% to 85% (80% answered within 120 seconds) within 3 months of assuming management, through scheduling optimization, coaching cadences, and queue management redesign.
- Designed Gallup-inspired behavioral interview framework and trained cross-departmental leadership on bias mitigation and candidate evaluation, improving quality of hire.
- Identified and implemented automation and self-serve (Tier 0) support initiatives, reducing escalation volume and improving first-contact resolution rates.
- Built weekly supervisor coaching cadence including shadowing, role-play, and structured feedback sessions to develop frontline leadership capability.
- Partnered with Workforce Management and Telephony teams on heat map scheduling, queue assignment, and operational coverage optimization.

Manager of Prospect Development *Bright Solar Marketing* | *May 2020 – June 2021 Las Vegas, NV*
Greenfield contact center build for a residential home services dealer network. Responsible for full department launch from real estate selection through operational maturity.

- Built and scaled a net-new contact center from zero to 100+ Prospect Development Specialists and 8 direct supervisor/support reports within one year.
- Sourced and secured contact center real estate, acting as liaison between headquarters and local vendors and property owners.
- Established all foundational operating elements: process guidelines, employee work standards, scheduling and forecasting models, core values, KPIs, and internal/external brand alignment.
- Oversaw end-to-end lead conversion pipeline, responsible for converting 20,000+ weekly inbound leads into residential service appointments for a third-party dealer network.

Senior Sales & Retention Supervisor *WOW! Internet, Cable & Phone* | *May 2004 – May 2018 Colorado Springs, CO*
14-year tenure spanning frontline sales through senior supervision. Led inside sales and retention operations for residential internet, TV, and phone products.

- Elevated company-wide sales conversion rate from 33% to 45% by facilitating sales boot camps and overhauling quality assurance scripts and guidelines for both sales and retention teams.
- Led and developed teams of 7 to 20 Inside Sales Specialists; designed quality expectations, sales motion frameworks, and talk tracks used organization-wide.
- Managed shift allocation and forecasting for contact and lead volume, ensuring adequate coverage across all hours and channels.
- Served as vendor liaison for HBO, Showtime, and Starz; facilitated mutual vendor incentive programs to support sales performance.

EDUCATION

Associate of Applied Science, Computer Information Systems | Pikes Peak
Community College

Colorado Springs, CO
